EDUCATION

- PG-DAC, CDAC**
Sep 2021 – Apr 2022
Pune
- B.E Mechanical Engineer, University of Mumbai**
Jun 2016 – Jun 2021
Navi Mumbai

CERTIFICATIONS

- Microsoft Certified : Azure Fundamentals (AZ-900)
- Scaler Academy (Java Full Stack Course)

SKILLS

- Performance Optimization
- Problem-Solving & Debugging
- Agile & Scrum Methodologies
- Collaboration & Cross-Functional Teamwork
- Communication & Documentation
- Performance Optimization
- Software Development Life Cycle (SDLC)

PROFILE

Java Full-Stack Developer with 3+ years of experience in building scalable web applications using Java, Spring Boot, Hibernate, Angular, and React. Skilled in REST APIs, microservices, and cloud platforms (Azure, Docker, Kubernetes). Proficient in PostgreSQL and Oracle databases. Experienced with design patterns (Singleton, Factory, Builder, MVC, Dependency Injection), performance optimization, and secure coding. Strong background in Agile, Git, CI/CD (GitLab, Jenkins), and testing tools (JUnit, Mockito).

WORK EXPERIENCE

UBS Business Solution MAY 2024 – PRESENT
Java Developer

ARC – Orchestrator

Event Orchestrator processes and stores events from multiple sources in a scalable event store or message queue, enabling event-driven microservices to subscribe and consume events efficiently.

- Developed event-driven microservices using Java, Spring Boot, Kafka for real-time event processing.
- Designed a scalable event store with PostgreSQL, managing schemas via PGAdmin.
- Managed CI/CD pipelines and version control using GitLab, automating builds and deployments.
- Deployed and orchestrated microservices with Docker, Helm, and Kubernetes for scalability.
- Leveraged Microsoft Azure services (AKS, Event Hubs, Storage) for cloud deployment and event streaming.
- Implemented logging, monitoring, and tracing using Azure Monitor.
- Ensured secure API communication with JWT, OAuth2, and API gateways.
- Followed best practices in testing (JUnit, Mockito) and CI/CD automation for high-quality code.

Credit Suisse Services AG June 2022 – May 2024
ENO – Full Stack Developer

Myriad – Critical Market Risk Calculation

Processes 5000+ daily feeds to extract and deliver risk data for investment decisions.

- Analyzed, tested, and implemented application features with user support.
- Managed secure server access and file transfers using SSH Tectia Client.
- Conducted code reviews to ensure maintainability and quality.
- Optimized application performance, resolving front-end and back-end bottlenecks.

Provided production support for Myriad as part of the ROTA team.

Technologies: Java, Angular, Oracle, PL/SQL, Node.js, Linux, Eclipse, IntelliJ, VS Code, Tectia, Bitbucket.
